

“MOVING WITH THE MOON: Mastering Universal Gravitation!”

Game For Windows PC

Now on sale at Steam and Microsoft Store

Wada System Limited released “MOVING WITH THE MOON: Mastering Universal Gravitation!” at Steam and Microsoft Store.

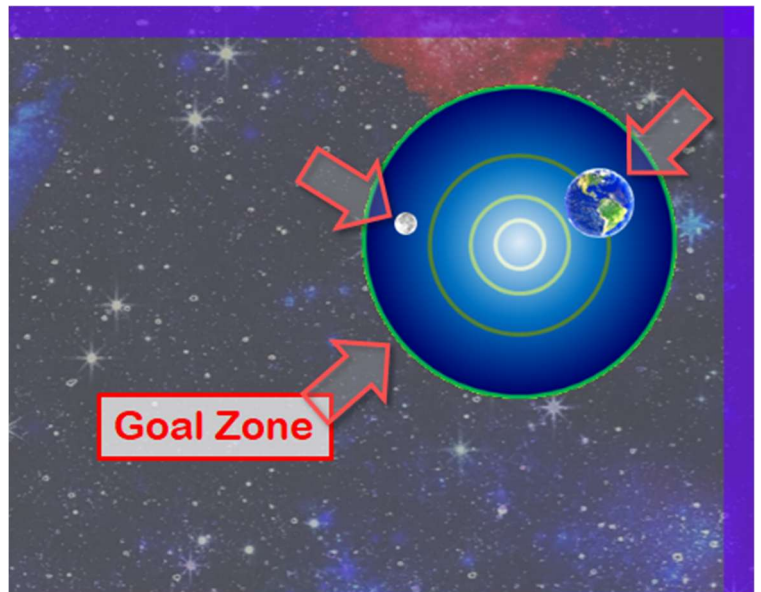

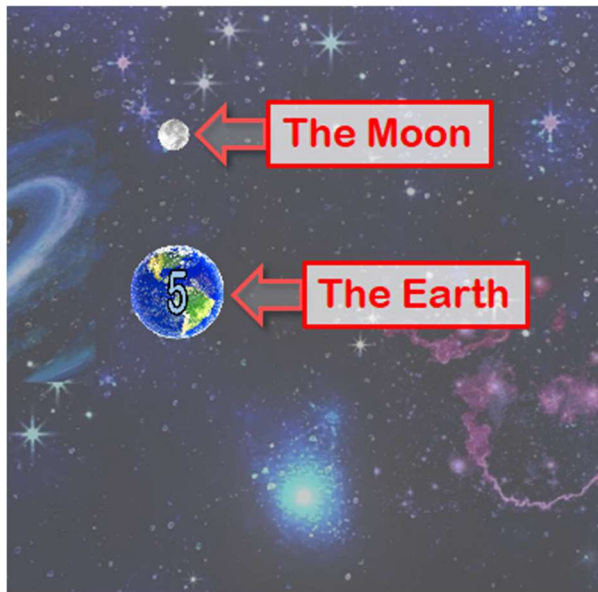

“MOVING WITH THE MOON: Mastering Universal Gravitation!” is a new type action game where you steer the Earth. It is simple rule and easy for anyone to play. And you can experience a simulated universal gravitation.

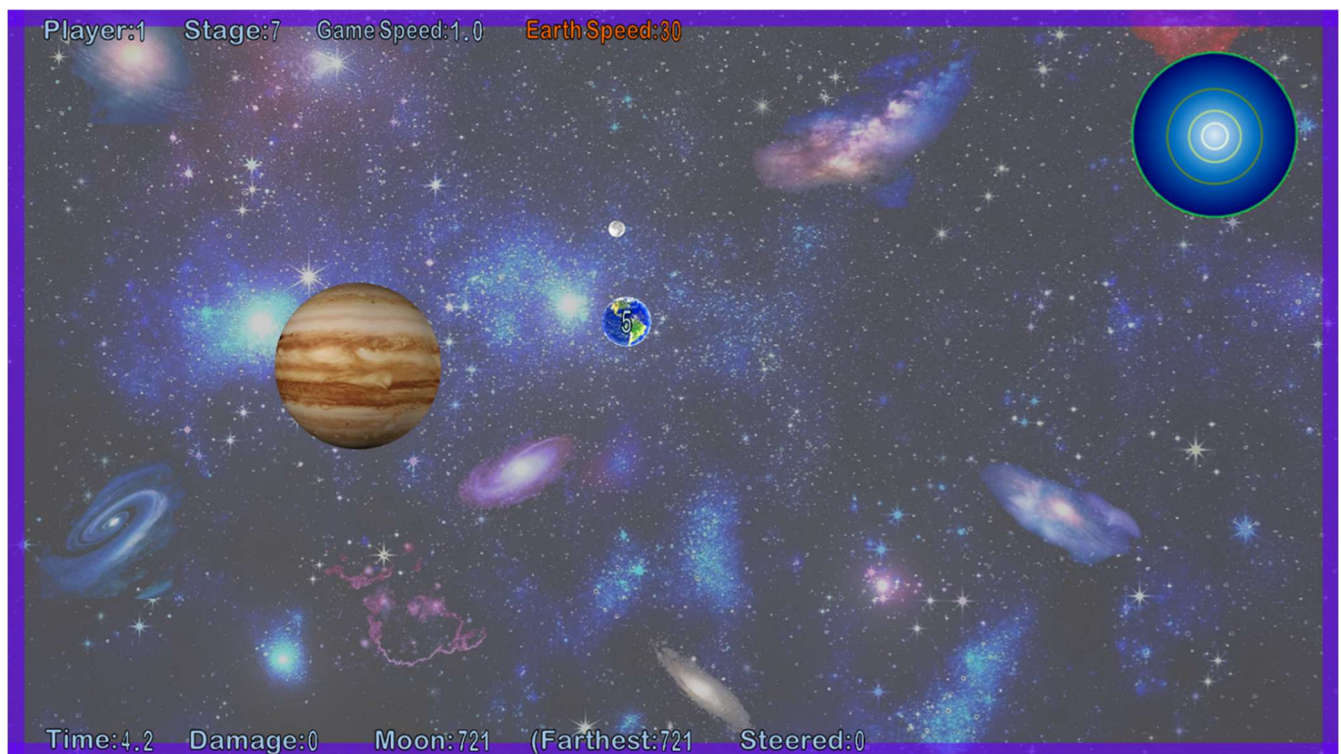

Simple Rule, Easy For Anyone To Play (Casual Game)

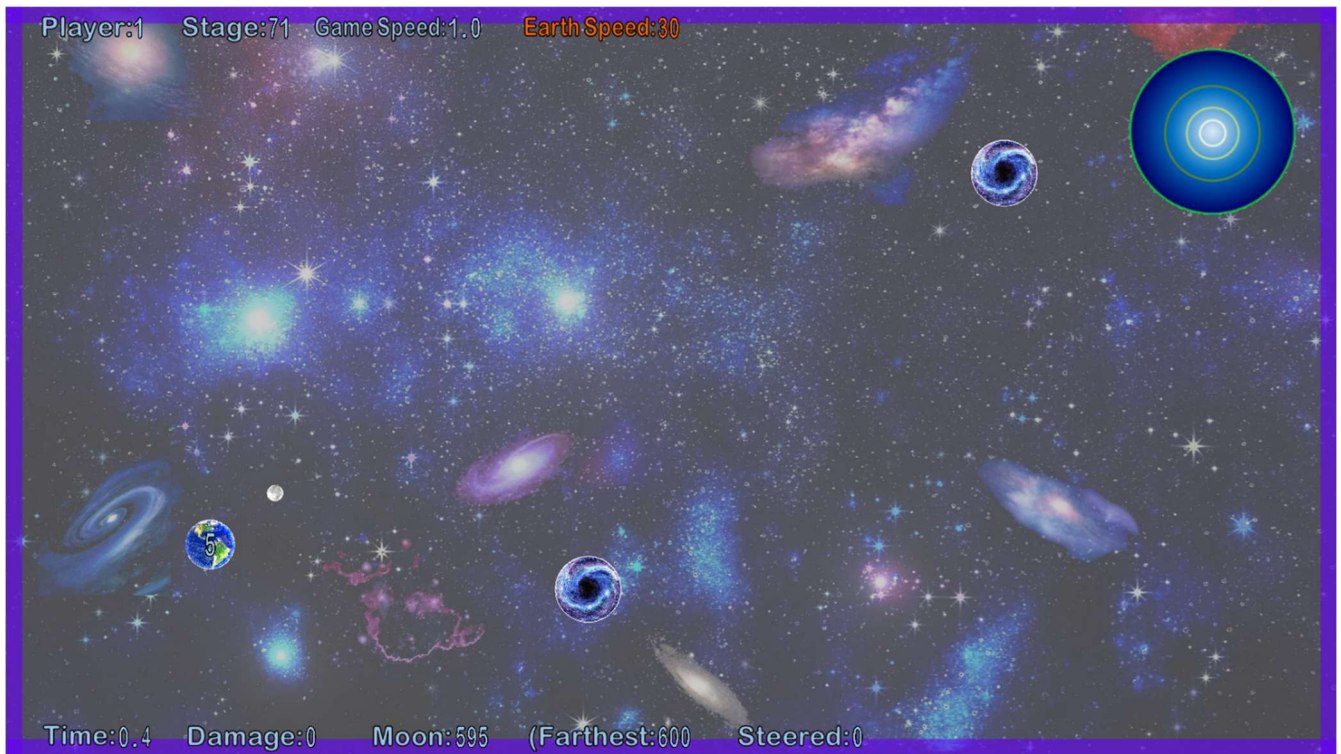

Steer the Earth, when both the Earth and the Moon are in the goal zone, the stage is cleared.

The Earth, the Moon, and other stars, have universal gravitation. You can't steer the Moon, but You can use the Earth's gravitational force to pull on the Moon.

Depending on the stage, there will be other stars, black holes, white holes, walls. There will be also a large stage that cannot fit on one screen.

Not Too Hard, Easy To Enjoy

We try to keep the difficulty level from being too hard. We want to make sure that you enjoy the various stages. Many of the stages are short, and allowing you to quickly restart or try again.

You can choose the game speed you like. If you are not good at this type of game, you can make it easier by slowing down the game speed.

If it's too easy for you, we recommend that you try to speed up the game or aim to clear it with a good records.

You can play any stage you want at any time. (There are 100 stages in total.)

Enjoyable Even For Spectators

Because the rules and controls are very simple, it's enjoyable even for spectators.

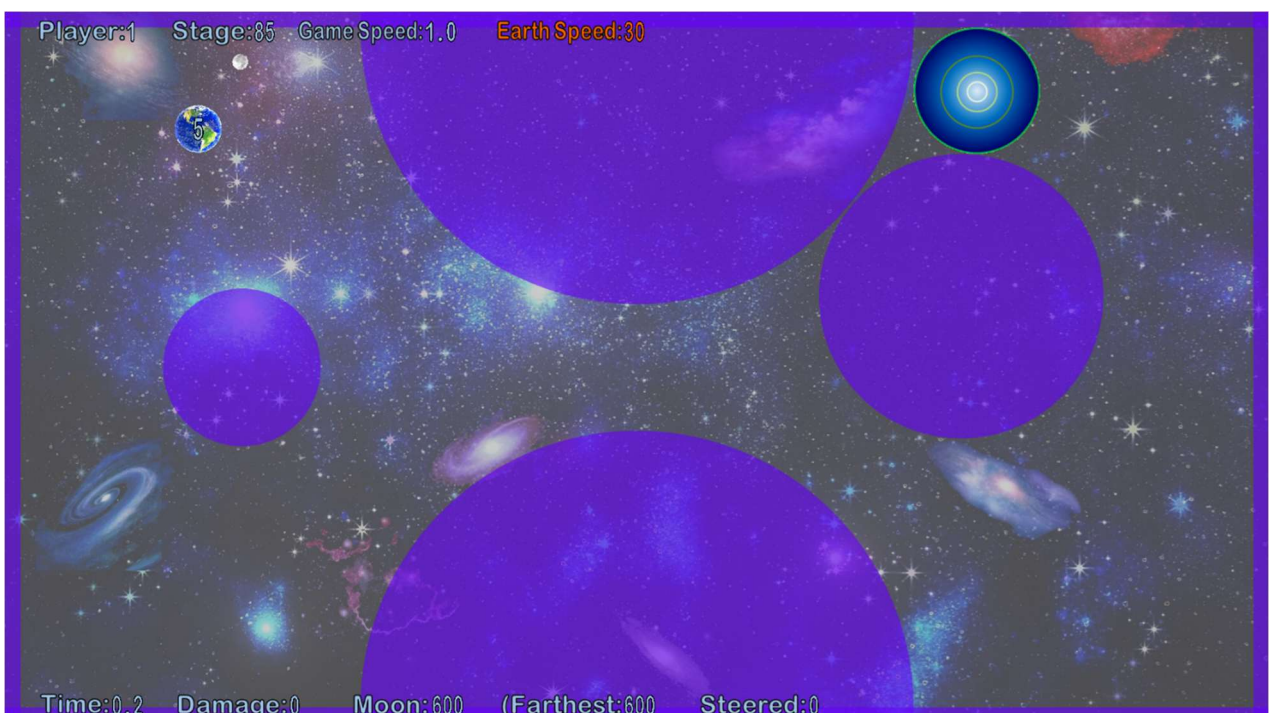

It would be nice to post or livestream game play videos on social media (YouTube, Instagram, TikTok, or others) and enjoy with everyone. Posting or livestreaming gameplay videos of this game on social media is generally fine.

May Help Advance Science

This game may be a fun way to get people interested in science. We would be happy if we could contribute to the development of science in this world.

It is generally fine to exhibit this game in space or science museums, etc. It is generally fine to let everyone to play freely in those facilities.
